

Giandemir Jaen

WEB DEVELOPER

I am a front-end focused full stack developer. Creating responsive and visually appealing websites that are both functional and user-friendly, is what I am passionate about.

EXPERIENCE

dielabeauty.nl

Beauty salon located in the Netherlands
-freelance project

- SEO emphasized with near-perfect *Lighthouse* scores.
- Instant language selector using `i18n` that switches content from Dutch to English, to be accessible for customers who don't speak Dutch.
- Owner has stated that the language selector has attracted in new non-speaking Dutch clients as a result.

PROJECTS

"Porsche-Mini-Wiki"

Full-stack application

live site - <https://porsche-fullstack.vercel.app>
source code - https://github.com/gian-de/porsche_fullstack

- Back-end consists of MySQL database hosted on AWS RDS, NodeJs/ExpressJs server hosted on render.com.
- Front-end uses "react-query" for state management which also caches selected/ filtered options for a blazing-fast user experience.
- Built to create and understand a web application from A-Z without using any 3rd party APIs or databases.
